

PatchSee®

" intelligent patch cord "

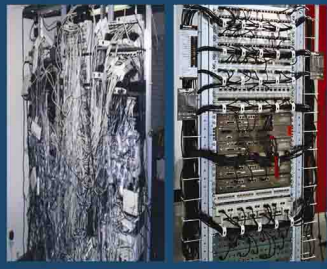

PatchSee® : the strong link for networks

- BasicPatch**
- Class6Patch**

Gain on :

- **security** : no handling error during troubleshooting operations - infallible light identification of both ends of the RJ45 patch cord
- **time** : optimize network availability (5 minutes of network downtime cost an average 1500 € to medium size companies)
- **simplicity** : identify both ends of the patch cord without any disconnection or disturbance of the data transmission (light injection)

BEFORE

AFTER

Quickly identify the end of the patch cord

See the light

... thanks to the light injected at the other end

More than 1.5 million users ... worldwide

Patent pending

PCI-6Patch For high density panels or active equipments - advanced technology ready for Cat6A 10Gbit/s standard ratification

DirectPatch For communication rooms and/or temporary installations - long length patch cords tested for Channel 6 standard compliance

PhonePatch For PABX application - cabinets and racks becomes up to 4 times less cluttered (cable diameter divided by 2)

PatchClip 16 colours of clips to identify your different application devices - to avoid managing coloured cables AND different lengths per colour - protect the tab of the RJ45 connector

PatchLight Available in 6 different colours of light to identify up to 6 patch cords at the same time

PRO-PatchLight PRO Model - supplied with charger kit - longer life battery with new added functionalities (powerful flashing mode ...)

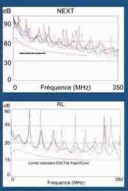

PatchGrip Tie cables up without stressing the sheath - easy use by unrolling the pre-cut strips (reusable)

Quality + Innovation = Performance

Garantee All patch cords are compliant to the standard specifications TIA/EIA - 568 - B.2 - 1 and ISO/IEC for Category 5e and 6

Test All patch cords are individually tested to deliver quality, performance and compliance to the standard

25 years warranty Guaranteed for all integrated Channel 6 patch cords on all manufacturers cabling systems (interoperability)
